

DINSTAR SIP Door Phone/Intercom System

Brief Introduction

Based on VoIP technology, SIP intercom door phone not only have traditional access control management function, but also have advanced digital voice function of one-touch button, and easily to integrate to 3rd part systems, especially easier to upgrade the old access system. Here are many applications in school, residential building, office building, gym room, stadium etc.

Highlight Performance

Daily intercom speaking
One touch intercom for internal communication

Call records
All the calls could be recorded in PBX server immediately 24/7 in the system.

Emergency help calling
Visitor could get efficient help from the monitoring center by pressing the intercom DSS button once emergency situation happened

Emergency intercom speaking
Other parties like indoor station room, monitoring center could participate in the multi-part communication if in an emergency situation

Onvif
Support Onvif to integrate 3rd part CCTV to communication for every parties.

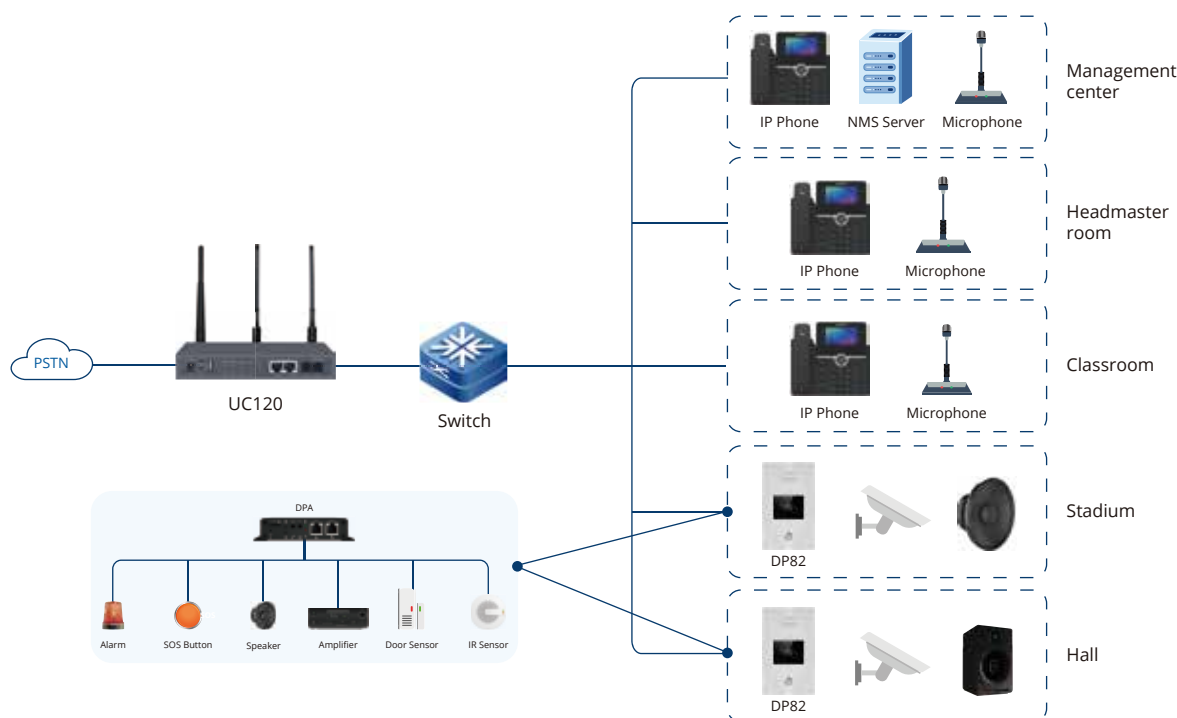

Easy to expand
Due to the SIP protocol, you can use integrate different vendors' devices only if they can support standard SIP protocol. Such like PBX, IP Phone, IP Door Phone/Intercom

Rich Hardware feature
Door phone/intercom support IP65 & POE, Wiganed port etc.
